① Vietnamese Children

As long as the sprout is healthy, the tree will grow strong. As long as the bud is strong, the flower will be fresh and will produce good fruits. Children are the sprouts and buds of the nation. As long as the children are well nurtured and educated, the nation can become powerful and independent.

The brutal Japanese and French have mercilessly oppressed our children. They teach the urban children to become ignorant, low and afraid only of Japan and France. They leave alone the rural children illiterate. Due to high rate of taxes which the parents can not afford to pay, so the children even only 8, 9 years old have to work very hard to do back-breaking labor to help their parents in paying the taxes to Japan and France!

Because the children are oppressed as much as adults, so they must struggle as much as the adults do. Traditionally the Vietnamese children have been as clever and courageous as others. More than 2,000 years ago when our country was invaded by external aggressors, a child ~~rode~~ on a horse with a sword smashed the aggressors. That child was Đông Thuyền vương.

When the revolution was highly exciting in the years of 1930-1931, the kids, boys and girls were courageous and heroic in helping the revolution: some guarded the roads, some acted as liasons for organizations, some tried to get information from the enemy. Many kids were arrested by the enemy who then hang the kids and tortured them very brutally, but the kids did not fear.

Recently, the high-level cadres went to inspect the
when

provinces, ^{in many} in many places even late at night the children still stayed with spear to guard the roads. The high-level cadres were very glad and moved and hope that the children elsewhere join the "Asso. of Pioneers for N.S." to help fight Japan and France for the independence of our country.

② Chinese Children: The patriotism of the Chinese children have for several times astonished the Japanese. The examples of 3 children is Hamon and 4 children is Hua Bei who had died will remain forever. Who wants to know this story, please ~~read~~ read the book "Experiences of China". Last month the Chinese children raised 316,400 dongs to buy gifts to give to soldiers in the front. Our children should follow this enthusiasm.

③ Russian Children: In the violent fighting between Germany and Russia, the Russian children have shown their heroic patriotism.

Last month, on a train, the Russian soldiers discovered some children who hid themselves under them on the train. When asked, the children replied that they wanted to go to fight Germans. Since they were not allowed to go, they had to hide themselves on the train.

④ Garden of Literature: a poem "Children"

Summary: The children are as buds on the tree, only knowing how to learn in schools. But in the situation when the country is lost, people exploited by invaders, the children also have to suffer hardships. So the children must unite with one another to struggle to save the country, for the future happiness. (A little child)

⑤ The high-level cadres said: brothers and sisters of the youth and women, let's help children to organize the "Asso. of Children for N.S."
