Executive Committees For National Salvation.

Strive hard!

SHORT-COMINGS OF EXECUTIVE COMMITTEES FOR NATIONAL SALVATION.

1, The Executive committees for national salutations from canton to provincial levels were elected long ago. Some were elected for the second time. However these committees haven't worked effectively. This is the biggest shortcoming of these committees. We have set up separate organizations, different walks of life such as associations for national salvation such as the youth association for national salvation, the peasant association for national salvation, the women association for national salvation, the pioneer association for national salvation, since each strata of people has special tasks different tasks. Then we elected the executive committees for national salvation to look after special duties - activities for national salvation. But these committees have not done anything so far. They should be criticized.

2, Those executive committees which have carried out regularly met and have issued resolutions in which there are correct points. That is a progress. Those resolutions which have not been put into practice are simply empty words just like nothing. Another point which should be taken into account is multiplying. It is partly due to multiplying that the executive committees were assembled. It is natural that this should be considered. But one calculation is enough. Too much counting is not necessary. Adding or reducing will be considered later. However much counting does not bring about more money. It should be used to make profits.

After having consulted a number of comrades, and negotiated with Viet-Minh provincial committees, the newspaper managing board intend to increase the price of each issue by 5 cents.

Considering the cost of paper and ink and other materials including the spending inside the board for the newspaper running over the newspaper work, 5 cents per each issue are not enough. Anyway better than 3 cents.

For those who want to buy the newspaper from this issue (number 158), please pay each month one and a half baos (0\$15). Those who had bought the newspaper before that the publication of this issue (158) pay the former price.

Thanks to a woman in Canton who set of paper. Independence for Comrade H.L. downed to kilograms of rice. INDEPENDENCE FOR V-N

3, Now the executive committees for national salvation should pay attention to the following points: 1, meeting once a month. meetings of cadres should be held when necessary. 2, It is not necessary to leave so many resolutions. what is most necessary and most feasible is given priority. 3, After resolutions are adopted, actions should follow at once. those who are in charge of any area must go there to perform their duties. 4, The next meetings should review what have been done, and draw experience from successes as well as failures.

National salvation activities are still poor - the executive committees for national salvation are not efficient! we must strive harder. R.V.

1, The other day the railway line from You-bai to Lao-cai was bombed, which have caused heavy damage. Japanese troops often used this line to go up to Lao-cai in anticipation of Chinese counter-attacks. Now this line has been cut.

2, Three army French army officers in Hanoi and an company officer representing Thung-Khau government have just fled to China. These French officers know that Japanese forces are in immediate danger, soon being counter-attacked by Britain, America and China, so they are not foolish to follow Japan to lay themselves deaths for themselves.

3, To celebrate two Thung Gsters' anniversary, H. Chau Canton. H. Canton in G-Y too held meetings solemn meetings. In D.R province the meeting in A commune, B canton was also large and full of fighting spirit. The meeting place was decorated with flowers, slogans written in cloth.

a strange person I know a strange person, who is stronger than anyone else, with one step he can travel from one place to another; with his hands he can remove mountains and dry rivers. He can see in darkness; He can hear noise from far away places. What he says is beneficial to the country and the people with determination he can carry through everything. He always wins when facing the enemy, for he is the strongest. Where is he living and who is he? please, tell our compatriots.

Those who want to reply send letters to the newspaper board - who give the right answer will be rewarded.

Recession - Germany After having occupied Vietnam, The Red Army is on the way to encircle the city of mo-Lauk, now only 50 kilometers away from the city.

North Africa: British troops have broken through and ^{overrun} the defence line. U.S. troops have also seized one city.

Britain 60,000 English men and women staged a demonstration, demanding that the British government should open the second front.

France Germany, for compelled French youths to join army to fight against French youths ^{deeply resent} feel deep more deeply resent against this. In only once province, several ten thousands youths refused to die for Germany and ^{now} rose up, using guerrilla tactics to fight against Germany forces very strongly.

Come forward to support B.S. In the canton D, D district with over 40 people attended collected more than 400 piastres. Not only the revolutionary army appreciated the pro brothers and sisters of Canton D, our whole organization also highly value the sacrifices of the people in Canton D.
