WHAT A FARCE !

Of late, Bo Tong, now a province chief, wrote to " Viet Minh brothers and sisters" a letter saying grosso modo : " Up to now we have struggled for the independence of the country, now the Japanese have given us the independence, why do we still hesitate to shoulder the task for the country ?"

Bo Tong said so, but he himself does not believe so. Who believes that the fascist imperiamost Japanese came here to overthrow the French then to give back to us the independence of the country ?

The fascist Japanese are the worst aggressors in the world now. Many experiences in Japanese-occupied countries have proven this. The experiences over 4 years in our country have also proven this.

Never the Japanese give us the independence. Such a story about the independence is only a farce, a cunning trick aimed at maintaining their shaky position in Indochina for some time!

Killings, lootings, rapes

Bo Tong said ; we have got independence, but the Japanese at any moment, anywhere came to the villages, they kill, loot people, rape the women. They would like to show themselves good towards the people in order to dupe them, but the beasts remain the beasts. Our people know too much them although they make disguise. That is why now Bo Tong praise the Japanese for giving us independence, is like 3 months before they also praise the French for "having protected" our country ! We have only to unmask them and cite their crimes : they are twice traitors to the Fatherland and deserve the death sentence.

THE CONFERENCE WITHOUT AUDIENCE

The clique of Tong and Le recently intended to convene an administrative conference on May 25, 1945 in Nuoc hai including all the village notables in the Hoa district. This conference has been convened by the Japanese and is aimed at discussing the administration in the district. The Japanese and their lackeys thought there will be many people participating in the conference. But on this date, nobody came although it has been already late in time!

WHERE WILL GO THE FARCE ?

The Japanese are driven by the Allies to their end. The Vietnamese traitors have been unmasked by the population, they are more and more isolated. When the Allied troops entered Indochina, our entire people and Liberation forces will rise up and will expel the aggressive fascists and at the same time will sweep off the clique of Vietnamese traitors.

WORLD NEWS

THE JAPANESE ARE IN A DESASTROUS SITUATION

1) The war in Europe is over. Now ~~xxx~~ Great Britain and the U.S. are ~~xxx~~ free to deal only with the short Japanese. The Allied troops have defeated the terrible Germans who are ten times stronger than the Japanese. At present, they on one hand are transferring troops and armaments from Europe to Asia, on the other hand they are helping China to build its forces; when these preparations are finished, Japan cannot survive the coming general counter-offensive.

2) Recently there are no much combat because the Allies are arranging the general counter-offensive. Only on the Okinawa island, war is always raging. Because the Okinawa island serves as entrance to Japan in the South about 500 km from Japan. The Japanese and the Allies recognize that the Okinawa island will decide the destiny of Japan. If the Allied troops seize Okinawa, they not only get another air force base, but also can rush on Japan.

3) Most active at present, are the air forces. The Allied air forces, while fighting the Japanese, have 3 goals : a) destroy military bases and production. b) Pose torpedoes a-round Japan, preventing Japanese ships to go to and from Japan. b) destroy communications routes and airports. So the Japanese will die soon.

4) In Europe, the Allied troops force German prisoners of war to rebuild the regions which have been ravaged by the Germans.
