QUICKLY IMPLEMENT THE 2 RESOLUTIONS :

1. SCORCHED EARTH POLICY

2. TO MAKE AN INTENSIVE MILITARY TRAINING

At present the situation is changing very quickly; we must make preparations to timely seize the opportunity.

1- The dangerous situation for the Japanese is closing, in many localities they are preparing their withdrawal. But before dying, these starving pirates will come back for lootings and destroying against the population.

2- And a certain number of pirates in action so far along the border, on the occasion of the Japanese withdrawal will make intrusions into our country to loot the population. Thus the mass organization gives notice to the entire people to quickly implement : the policy of scorched earth and the local armed forces must make an intensive military training in preparation for the combat.

The local responsible comrades must immediately have these 2 resolutions implemented. The Liberation Armed Forces group must help the population in implementing the scorched earth policy and help the militiamen and partisans to quickly make a military training

At present, to keep food at home to feed the enemy, to keep the furniture at home to be used by the enemy, means to indirectly help the enemy. In these times, anyone makes no efforts in military training, does not fulfill one duty of a revolutionary military man.

FORMATION OF A LIBERATION ARMED FORCES GROUP

On June 3 at the T.P. District, B.C. province, 1 company of Liberation Armed Forces has been newly recruited. The number of candidates outnumbered the recruits envisaged. Some comrades, due to bad health, weak sight or lack of necessary conditions, must return to their localities for work. They cried or said : "I have not passed the examination, on coming back to my locality, I will kill myself " The mass organization admires such comrades but the revolutionary work ~~at~~ on the Front as well at the rear base is necessary all the same. Specially at present as the situation *will change soon,*

the combat will take place in the localities. The mass organization hopes that those comrades who must return home will put their enthusiasm in the service of their localities. In the future there will be more recruitments, and you will be in turn.

Spiritual salutations

VIET MINH ON THE INTERNATIONAL ARENA

After the recent coup d'Etat, Japan overthrew France in Indochina... Meanwhile Viet Minh organized " the Liberation Armed Forces" to fight against the Japanese in many regions. The movement of resistance against the Japanese, led by Viet Minh has drawn the international attention. Recently a chinese newspaper wrote : After Japan overthrew the French power, the Vietnamese people are not resigned to Japanese oppression, have risen up to resist against them. They organized guerilla groups and have intensive activities. The movement of resistance against the Japanese develop powerfully...

And 2 US newspapers wrote also : At present in Indochina the Alliance for the independance of Vietnam is the unified front of the Vietnamese political parties is preparing to organize " a Provisional Military Government " in order to cooperate with the Allied troops in fighting the Japanese. When the Allied troops launched a counter-offensive in Indochina, they were welcomed by the Viet Minh organizations already set up. Viet Minh has 50.000 members who are using guerilla tactics to fight against the Japanese. This organization advocates the alliance with the Chinese and the fight against the Japanese, the support to the Allies and the liberation of Viet Nam. This organization at present is the most powerful organization in Vietnam...( National Herald and The Shangai Evening )

... Let us make further efforts to expel the fascist Japanese and to make Vietnam entirelyly independent.

WOMEN IN SERVICE OF THE ARMED FORCES

During the war, 2 things are important : firstly the fighting on the Front, secondly the production in the rear base. The combatants on the front cannot score victories if they do not receive supplies from the rear base. So in different localities the organizations " The women in service of the Armed Forces" must be set up. All women including the old ones can join these organizations. Their essential work is to boost the production and to help the army such as to weave cloth, to make sewings, embroideries, shoes for the armed forces...These organizations will have the great merit in helping the armed forces ~~to~~ to fight against the enemy.
