HIGH MOVEMENT OF NATIONAL LIBERATION IN SOUTH EAST ASIA

A high movement of struggle demanding independence is rising in the small countries over the world. Particularly in South East Asia, this high movement is stronger and stronger, beginning with Viet Nam to reach Laos, Cambodia, then Thailand, down to Malaysia, India, Ceylan and the Indonesian archipelago. In Vietnam and the Indonesian archipelago, the flames of the resistance war against the imperialist aggressors have burst off and are spreading and may lead the humanity to an 3th world war if the Allies countries do not realise the "self determination" principle in this region. Nearly one thousand million people suffering from the oppression and exploitation under the yoke of barbarous imperialists, have risen up, closely united, in a resolute struggle against the aggressors.

The waves of national liberation are growing more and more.

In the imperialist countries the labouring people also support strongly the national liberation movement in the world.

In Holland, the sailors refused to go aboard the ships sent for the attack against the Indonesian archipelago. The dockers in Australia (belonging to England) went on a strike, refusing to load guns and ammunitions on ships bound to Indonesia and they staged demonstrations in support of Vietnam and the Indonesian archipelago.

Over 20.000 people, including French and Vietnamese, in Paris have staged a strike acclaiming the heroic people of Nam bo and supporting the independence of Vietnam.

With the close solidarity of the workers and all the oppressed nations over the world, the revolution will certainly be victorious.

AGAINST ILLITERACY ⑥

The Cultural Committee of Boi Chau has just published 2 first books : methods and teaching the new Vietnamese language. The studies programme has been sent to different districts. The Viet Minh committees of Tran Phu district and of other districts will have to make many copies of it and to distribute it to all teachers.

The cadres, particularly the teachers and the officials responsible with cultural control, and all the Viet Minh committees for national salvation must spare

must spare no efforts in the struggle against illiteracy. With these documents, the teachers will teach their pupils, washing off their mind the old slavish, reactionary thinking and inculcating in their mind a strong nationalist spirit.

According to the declaration made by the Ministry of Education of the Democratic Republic of Vietnam, in one year the whole people of Vietnam from 8 years of age and over must know how to read and write the Vietnamese language.

A high movement for national salvation is only possible when the cultural level of the population is high.

At last, the editorial board of the newspaper appeals to the whole population to give full support to the cultural committees for the fulfilment of their duties.
